

Practical Scopes for Practical Rifles.

Does the price make the scope? Here (below) are two very similar scopes with very different price tags. This first one gets the nod (from me) as “good enough.”

I also have 1-6 FFP LPVO scopes. 1-10 is better. Much better IMHO.

Monstrum Panzer ED 1-10x24 First Focal Plane FFP LPVO Scope | Black

Color: **Anodized Stealth**

If you type the descriptions of these scopes into the Amazon website you'll find these pictures and descriptions.

Then to see a 15-minute YouTube video that compares these scope side-by-side in a very fair and honest way go here: <https://www.youtube.com/watch?v=Nb3j6C0T5YU>

The high-priced scope is better, in small ways. Is it \$2200 better. (Few think so.)

Be sure to study the subject before spending the money.
